REVX Design System

This document outlines the core visual primitives and component structures for the REVX workspace environment. The design prioritizes a high-contrast dark mode tailored for extended coding and prompting sessions.

1. Color Palette

The color system uses deep neutral tones for backgrounds to reduce eye strain, paired with vibrant, high-saturation accents for interactive elements and syntax highlighting.

Workspace Base
`#09090B`

Panel Surface
`#18181B`

Primary Accent
`#D946EF`

Secondary Accent
`#06B6D4`

Tertiary Accent
`#EAB308`

Success State
`#10B981`

2. Typography

The interface relies on two primary typefaces: a clean sans-serif for UI elements and a monospace font for the editor blocks.

Primary UI: Public Sans

Aa Bb Cc Dd Ee

Weights: Regular (400), Medium (500), SemiBold (600)

Editor Code: Monospace

```
<tag attr="value">Code Block</tag>
```

Weights: Regular (400)

3. Core Components

UI elements utilize a subtle border radius (0.25rem - 0.375rem) and distinct hover/active states driven by the accent colors.

4. Spacing & Layout

- **App Shell:** Fixed navigation bars with z-index elevation.
- **Panels:** Resizable split-panes using 1px borders (#334155) for separation.

- **Padding:** Standard inner padding for cards is 16px to 20px. Compact list items use 8px spacing.
